Subject: Participate in Novel Story Analysis Research at UCLA!

Dear {{department_name}} Students,

My name is Violet Peng and I'm an Assistant Professor in the Computer Science department here at UCLA. My team and I are excited to extend a unique opportunity to all undergraduate students in the {{department_name}} department to take part in a voluntary UCLA Research Study that delves into the psychological depths of storytelling.

Project Insight:
Our mission is to dissect a collection of 100 short stories written by humans and modern AI systems, exploring the myriad ways in which they invoke psychological depth. Your analysis will aid in identifying underlying themes, patterns, and narratives that echo profound human sentiments, thereby enriching our comprehension of the complex tapestry of human emotions.

Why Participate?
Skill Enhancement: Hone your analytical acumen and English proficiency as you navigate the psychological undercurrents of diverse narratives.
Financial Incentive: Earn $100 in recognition of your invaluable input.

Participant Profile:

- Age 18+
- Fluency in English
- Keen analytical abilities
- A fascination with storytelling, narratives, or literary critique
- Able to commit to approximately 5.5 hours of annotation time over a week-long period

Intrigued?
Apply here: https://tinyurl.com/ucla-psych-depth

Opportunities are limited, so prompt action is encouraged!

Should you have any questions, feel free to connect. We look forward to exploring the depths of storytelling with you!

Best wishes,

Violet Peng
